Regional Operations Center
Salt Lake City, UT*

WEATHER KEY POINTS

11/06/21 - 11/12/21

Saturday-Tuesday

- Areas of dense fog will be noted across coastal southern California through late morning Saturday, while periods of light to moderate rain and mountain snow persist across far northern California through Saturday night, with snow levels ranging around 6,000 to 7,000 feet through early Sunday. Gusty winds of 35 to 50 mph will also persist across the Sierra through Saturday night.
- Additional isolated rain and mountain snow showers could continue across northern California on Sunday, with no impacts expected
- A stronger storm system appears on track to impact much of northern and central California Monday and Tuesday
 - Gusty winds are expected across northern California, with the strongest winds near the Oregon border
 - Moderate to locally heavy rain and mountain snow is possible
 - Snow levels look to be much lower with this storm across much of northern California, with accumulating snow in most mountain locations

Wednesday-Friday

- Drier and generally quieter weather is expected Wednesday through the end of the week
 - A few light showers could linger in far northern California, but no significant precipitation impacts are expected
 - Gusty offshore winds are possible across southern California Wednesday through Friday, with the strongest winds currently expected on Thursday
